RE: Project # 3028516----Trees.

I am emailing in regards to this project in the neighborhood of Victory Heights. As I understand there will be 6 house built on 2 lots with many trees. I am very concerned about the projects in the neighborhood and the cutting of trees. I am not against the building of the homes but cutting all the trees down (big cedar trees) is a shame.

These two lot have huge trees one in which has 5 truck tree; a very unusual tree. Why are you letting the developer cut down these trees? This neighborhood is known for the beautiful trees. There is a way to build without cutting down all the trees for this project. It may be more work but possible. The people of the community depend on the Department of Construction and Inspection to allow the trees to stay standing that are many years old regardless of the price a builder pays to cut them down!

I would appreciate a responds to the cutting of the trees on this project #3028516.

Thank you.
